# **Idea/Approach Details**

Ministry Category: Government Of Maharashtra Problem Code: #GMH14

Problem Statement: Online PMAY Training modules for ULBs and Citizens Current AICTE Application No :1-461064671

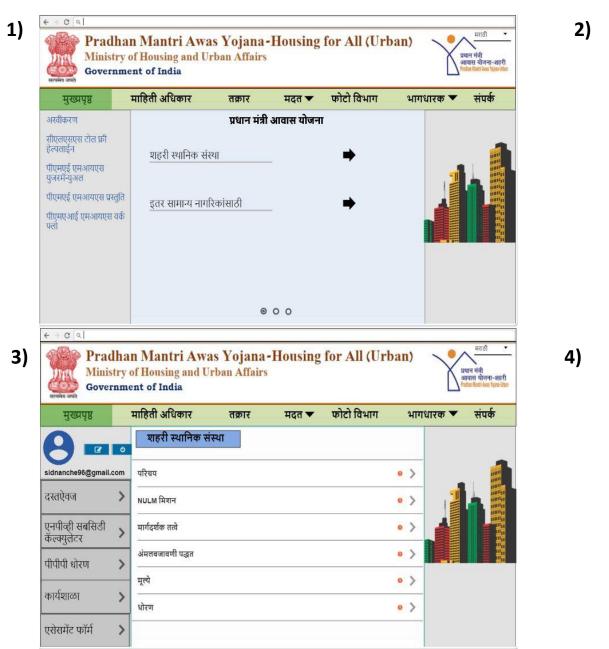

Team Leader Name: Nanche Siddhesh Ravindra

**Idea**: Develop an e-learning application for capacity building of Urban Local Bodies in Maharashtra and create awareness among the citizens on Pradhan mantra Awas Yojana (Urban).

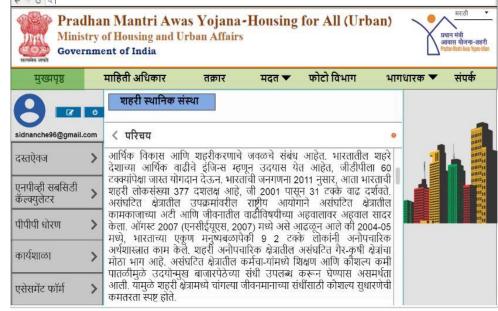

# **Solution & Prototype:**

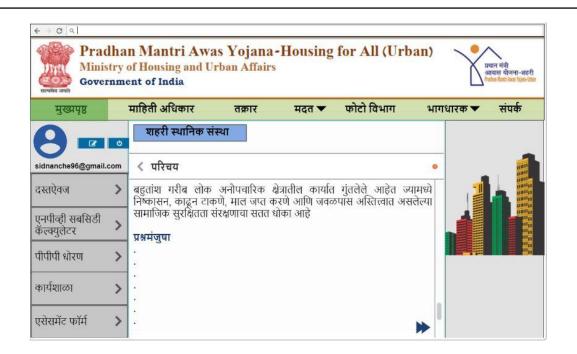

- The application have 2 sections separately.
- One being for Urban Local Body and other for General Citizens.
- User select either one of the option on visiting the homepage
- The section for Urban Local Bodies is accessed by login credentials
- The system have provision to create such users
- Post login, various topics related to PMAY with their detailed description can be accessed
- At the end each topic quiz is started
- The section for general citizens having the scheme information can be accessed without any restrictions
- Deployment of content management system for both the sections enabling department to update content from time to time
- The content is of text, images or video
- By default, the webpage open in Marathi language.

#### **User Interface:**

5)

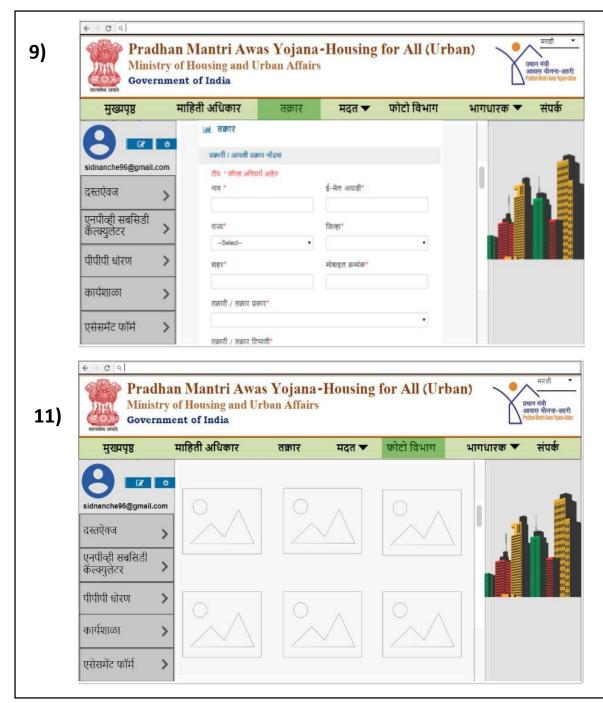

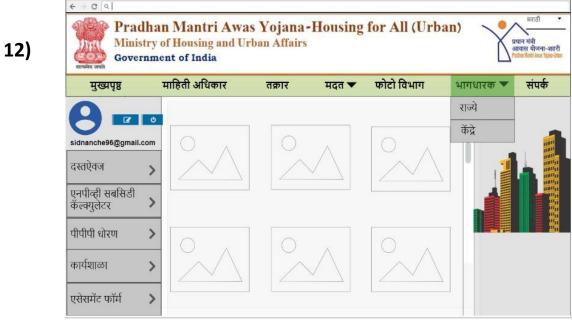

6)

8)

# **Technology stack:**

- PHP updated version, html5, css, python, java script, jquery is used to create this webpage
- My SQL database server is used to store content in database

#### Use Ca

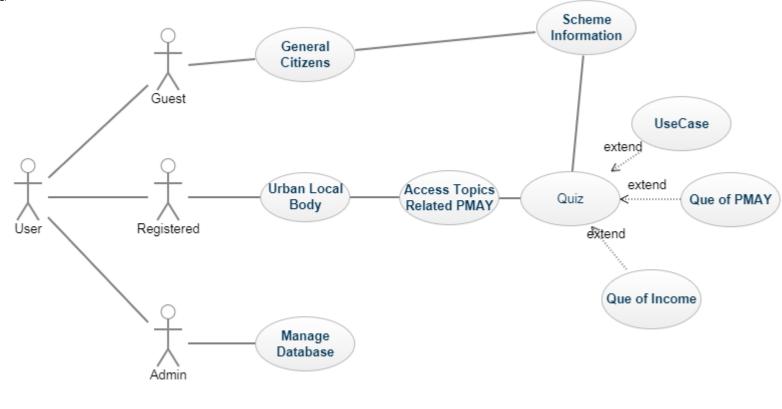

Fig Use Case Diagram

# **Dependencies:**

• The project external requirement will only be the set of rules that the ministry wants in this project

### **Stopper:**

- This Web application contains all the information which is given by the ministry
- Also contain two separate parts for two types of user i.e Urban Local Body and other for General Citizens
